

Need for religious stock control satisfied

“The award winning Club KO is a large, plush club in North London with a great vibe”

The stylish Club KO is the most popular multi million pound venue in North London, featuring a fashionable and luxurious setting, a powerful and high quality sound and lighting system! Club KO is extremely safe thanks to a strong security team.

EPOS Solution

Six QT6000 touch screen terminals which are networked to a back office pc with stock management software (PC-HOS) installed.

Club KO has three bars which are all spaced out from each other with the dance floor between them. The large spaces between the bars and the presence of the dance floor between them meant that the cabling required to network the QT6000 touch screens together and to the back office pc which was located up on the 3rd floor of the building was a difficult task, however IKA was able to make a tidy job of this.

Of the six QT6000 touch screens, two were located at a bar in the VIP section of the club. Club KO required IKA to supply them with a custom feature which enabled the club to provide their exclusive members with a bar tab facility which could be utilized from these two Casio touch screens.

Business benefits

The QT range of Casio touch screen cash registers were needed by the Club KO club as they thrive under the conditions present in a night club. The combination of the networked QT's and the back office pc running PC-HOS provided by IKA Retail solutions has enabled the Club KO perform accurate stock takes with ease fully satisfying the owner who feels that stock taking is an extremely important part of running this sort of business and therefore desires stock taking to be performed religiously.

What they say...

“I feel that stock taking is very important, I insist on stock takes to be performed weekly. With the help of IKA this process has been made very quick and easy, my manager can record an entire stock take using IKA's system in just 2hrs. Once a week I arrive at my club by 12pm and all the necessary stock reports are ready for me to check over.” – Nick Theo (managing director).
